Dear Pool Contractor,

Please review the following plan submittal requirements for permitting process. Our office hours are Monday through Friday 7:30 A.M. to 4:30 P.M. Our phone number is (214) 521-4161, should you have any questions.

**LIST OF REQUIREMENTS FOR POOL/SPA**

- Two Sets of Plans (3’min water to p.l. & easement line)
- Survey (With R.P.L.S. Stamp)
- **Oncor approval stamp required on plan**
- Site Plan
- Section of Pool and/or Spa *with dimensions*
- Show 3’ Drain Separations and Anti Vortex Covers to prevent entrapment (ANSI/APSP-7)
- Diving Board & Pool Dimensions per APSP Standards (if applicable)
- Deck Layout (if applicable)
- Drainage System Layout (Separate permit req’d & no discharge into easement!)
- Equipment Location *(not in req’d side yard setback of house & not in easement)*
- All dwelling doors that serve as enclosure to pool to comply w/Append.Q of 2015 IRC
- Electrical Service on Site Plan (Overhead service drop @ 10ft min horizontally from water’s edge)
- Fence (48”Ht min) w/Self-Closing & Self-Latching Gates & w/Four (4) Inch Maximum Openings
- Permit Fee ($10.00 per $1,000.00 of total construction cost… $50.00 min permit fee)
- **Gunite must be pre-mixed (Open-top site mixed gunite equipment is prohibited!)*

**Required Inspections:**

- - Belly Steel
- - Grounding (By Electrician, either belly steel &/or deck steel)
- - Plumbing To Equipment (gas & p-trap by Plumber)
- - Deck Steel & Grounding
- - Pre-Plaster (w/enclosure, gates, door alarms, and anti-entrapment drains)
- - Pool Final

Sincerely,

**Building Inspection Department**

**Kirk Smith**  
Development Svcs Mgr  
ksmith@hptx.org

**Don Young**  
Senior Building Inspector  
dyoung@hptx.org

**Mary Kuebler**  
Permit Technician  
mkuebler@hptx.org

**Gabriel Rojas**  
Building Inspector  
grojas@hptx.org
The undersigned hereby applies for a permit to build according to the submitted plans and specifications, a copy of which must be kept on the premises at all times during construction, and also agrees to complete this work in full conformity with the Ordinances of the Town of Highland Park and further applies for a Certificate of Occupancy and Compliance.

This permit becomes void unless the work is commenced within ninety (90) days from this date or if the work is abandoned or suspended, at any time after work is commenced, for a period of ninety (90) days.

OWNER: ___________________________ Address: ___________________________
LOT: __________________ BLOCK: ___________ ADDITION: __________________
JOB SITE: Number _______ Street: ______________________ District: __________
Building to be USED AND OCCUPIED as ______________________ for _______ UNITS.

Description of Work:

Depth range of pool: ___________________________(i.e. 3’0” - 5’0” - 4’0”)
Construct new swimming pool with ______ sf of water area and _______ spa / no spa included.
Equipment will be located ______________________________________________________
Install approx. ______ sf of ________ (stone, concrete, brick….) deck. Drainage system and
arbor not included in this permit and separate permit is required for each. See plan attached to
this application. Gunite must be pre-mixed. Open-topped gunite mixing equipment is strictly prohibited.

---------------------------------------------------------------------------To Be Completed by Building Department-----------------------------------------------------------------------------

Permit Type:
☐ Ancy-Non-C ☐ Antenna ☐ Bpermit ☐ Commercial ☐ Concrete ☐ Drain ☐ Fence ☐ Fire ☐ Irrig
☐ Mech ☐ Move ☐ New ☐ Paint/Repairs ☐ Pool ☐ Raze ☐ Remodel ☐ Reroof ☐ Sign
☐ Tearout ☐ Tent ☐ OTHER

NOTE:
1. No change in the plans and specifications herewith presented for the construction or location of this building shall be made without the consent of the Building Inspector.
2. I, or we, hereby covenant to restore any and all damages to the Town sidewalks, streets, alleys, water mains, etc., which may result from this work.
3. At the beginning of work under this permit the Owner or Contractor must place in a conspicuous place in front of the premises a sign that will be furnished by the Department of Building Inspection stating that a Building Permit has been issued for this work.
4. No projection of any kind which may be beyond the street or alley or easement line is included or authorized in the permit under this application.
5. The Town of Highland Park zoning ordinance prohibits the display of business signs in residentially zoned districts.
6. Construction fences are not allowed in the required front yard.

ESTIMATED COST OF CONSTRUCTION: $ __________________

Section 7-201 SPECIAL DEFINITIONS – (13.) Swimming Pool (Private) A pool and related equipment located on a building site and which is an accessory use and designed and used only in relation to the occupancy of the premises. The edge of the pool’s water surface shall be located a minimum of three (3) feet from the side or rear property line or easement line if no alley exists. Pool equipment may be located to the rear property line or easement line if no alley exists. All swimming pools shall be located behind the front building line. (Ord. No. 1008, § 1(1), 9-6-1983)

Section 15-101 FENCE REGULATIONS – Swimming pools shall be completely surrounded by a fence or wall not less than four (4) feet in height, which shall be so constructed as not to have openings, holes or gaps larger than four (4) inches in any dimension except for doors and gates. A dwelling house or accessory building may be used as part of such enclosure. All gates or doors opening through such enclosure shall be equipped with a self-closing and self-latching device for keeping the gates and doors securely closed at all times when not in actual use, except that the door of any dwelling which forms a part of the enclosure need not be so equipped (see IRC App. Q). (Ord. No. 972, § 10, 5-4-1970; Ord. No. 847, § 1, 3-1-1976; Ord. No. 972, § 8, 12-28-1981; Ord. No. 1008, § 3, 9-6-1983)

(POLICIES)

Sec. 8.01.010 Mixing or dropping concrete or mortar on pavement
It shall be unlawful for any person to mix concrete or mortar or any mixture or substance containing cement on any existing pavement on public property or to leave or cause to be left any excess concrete or mortar or any mixture or substance containing cement on any existing pavement on public property, or to allow same to leak or fall from any container or receptacle onto pavement on public property. If any concrete, mortar or any mixture or substance containing cement is accidentally dropped or placed upon any pavement on public property within the Town, the person responsible shall immediately remove same before such substance hardens or sets on such pavement. (1971 Code, sec. 14-7)

Sec. 13.05.005 Unlawful accumulations of waste; littering
(a) It shall be unlawful for any person to place or throw any solid waste of any kind or character upon any street, sidewalk, alley, easement, public park, or private property in the Town.
(b) It shall be unlawful for any person to sweep, throw, or deposit any solid waste, landscape waste, construction and demolition debris into, upon, or along any drain, gutter, alley, sidewalk, parkway, easement, street, or vacant lot, or upon any public or private property within the corporate limits of the Town.
Sec. 13.07.005  Prohibited activities and conditions adversely affecting water quality

It shall be unlawful for any person to:

(2) Introduce or cause to be introduced into the Town’s MS4 any harmful quantity of sediment, silt, earth, soil, or other material associated with clearing, grading, excavation or other construction activities, or associated with landfilling or other placement or disposal of soil, rock, or other earth materials, in excess of what could be retained on site or captured by employing sediment and erosion control measures to the maximum extent practicable under prevailing circumstances.

(8) Permit unused materials from ready-mix concrete mortar, and asphalt base delivery trucks to be dumped to any area that may drain to the Town’s MS4;

(11) Dump, spill, leak, pump, pour, emit, empty, discharge, leach, dispose, or otherwise introduce or cause, allow, or permit to be introduced any of the following substances into the Town’s MS4:

(J) Any ready-mixed concrete, mortar, ceramic, or asphalt base material or hydromulch material, or material from the cleaning of vehicles or equipment containing, or used in transporting or applying, such material;

(K) Any asphaltic or concrete slurry caused from cutting or coring activities;

(M) Any filter backwash from a swimming pool, fountain, or spa;

(N) Any swimming pool water containing any harmful quantity of chlorine, muriatic acid or other chemical used in the treatment or disinfection of the swimming pool water or in pool cleaning;
Appendix Q Reserved. Amended to read as follows:

Appendix Q. Swimming Pools, Spas and Hot Tubs.

SECTION AQI01 GENERAL

AQ101.1 General.

The provisions of this appendix shall control the design and construction of swimming pools, spas and hot tubs installed in or on the lot of a one- or two-family dwelling.

AQ101.2 Pools in flood hazard areas.

Pools that are located in flood hazard areas established by Table R301.2(1), including above-ground pools, on-ground pools and in-ground pools that involve placement of fill, shall comply with Section AQ101.2.1 or AQ101.2.2.

Exception: Pools located in riverine flood hazard areas which are outside of designated floodways.

AQ101.2.1 Pools located in designated floodways.
Where pools are located in designated floodways, documentation shall be submitted to the building official which demonstrates that the construction of the pool will not increase the design flood elevation at any point within the jurisdiction.

AQ101.2.2 Pools located where floodways have not been designated.
Where pools are located where design flood elevations are specified but floodways have not been designated, the applicant shall provide a floodway analysis that demonstrates that the proposed pool will not increase the design flood elevation more than 1 foot (305 mm) at any point within the jurisdiction.

SECTION AQ102 DEFINITIONS

AQ102.1 General.
For the purposes of these requirements, the terms used shall be defined as follows and as set forth in Chapter 2.

ABOVE-GROUND/ON-GROUND POOL. See "Swimming pool."

BARRIBR. A fence, wall, building wall or combination thereof which completely surrounds the swimming pool and obstructs access to the swimming pool.

HOT TUB. See "Swimming pool." IN-GROUND POOL. See "Swimming pool."

RESIDENTIAL. That which is situated on the premises of a detached one- or two-family dwelling, or a one-family townhouse not more than three stories in height.
SPA, NONPORTABLE. See "Swimming pool."

SPA, PORTABLE. A nonpermanent structure intended for recreational bathing, in which all controls, water-heating and water-circulating equipment are an integral part of the product.

SWIMMING POOL. Any structure intended for swimming or recreational bathing that contains water more than 24 inches (610 mm) deep. This includes in-ground, above-ground and on-ground swimming pools, hot tubs and spas.

SWIMMING POOL, INDOOR. A swimming pool which is totally contained within a structure and surrounded on all four sides by the walls of the enclosing structure.

SWIMMING POOL, OUTDOOR. Any swimming pool which is not an indoor pool.

SECTION AQ103 SWIMMING POOLS

AQ103.1 In-ground pools.
In-ground pools shall be designed and constructed in compliance with ANSI/NSPI-5.

AQ103.2 Above-ground and on-ground pools.
Above-ground and on-ground pools shall be designed and constructed in compliance with ANSI/NSPI-4.

AQ103.3 Pools in flood hazard areas.
In flood hazard areas established by Table R301.2(1), pools in coastal high-hazard areas shall be designed and constructed in compliance with ASCE 24.

SECTION AQ104 SPAS AND HOT TUBS

AQ104.1 Permanently installed spas and hot tubs.
Permanently installed spas and hot tubs shall be designed and constructed in compliance with ANSI/NSPI-3.

AQ104.2 Portable spas and hot tubs.
Portable spas and hot tubs shall be designed and constructed in compliance with ANSI/NSPI-6.

SECTION AQ105 BARRIER REQUIREMENTS

AQ105.1 Application.
The provisions of this appendix shall control the design of barriers for residential swimming pools, spas and hot tubs. These design controls are intended to provide protection against potential drownings and near-drownings by restricting access to swimming pools, spas and hot tubs.
AQ105.2 Outdoor swimming pool. An outdoor swimming pool, including an in-ground, above-ground or on-ground pool, hot tub or spa shall be surrounded by a barrier which shall comply with the following:

1. The top of the barrier shall be at least 48 inches (1219mm) above grade measured on the side of the barrier, which faces away from the swimming pool. The maximum vertical clearance between grade and the bottom of the barrier shall be 2 inches (51mm) measured on the side of the barrier, which faces away from the swimming pool. Where the top of the pool structure is above grade, such as an above-ground pool, the barrier may be at ground level, such as the pool structure, or mounted on top of the pool structure. Where the barrier is mounted on top of the pool structure, the maximum vertical clearance between the top of the pool structure and the bottom of the barrier shall be 4 inches (102mm).

2. Openings in the barrier shall not allow passage of a 4-inch-diameter (102mm) sphere.

3. Solid barriers which do not have openings, such as a masonry or stone wall, shall not contain indentations or protrusions except for normal construction tolerances and tooled masonry joints.

4. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is less than 45 inches (1143mm), the horizontal members shall be located on the swimming pool side of the fence. Spacing between vertical members shall not exceed 1.75 inches (44mm) in width. Where there are decorative cutouts within vertical members, spacing within the cutouts shall not exceed 1.75 inches (44 mm) in width.

5. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is 45 inches (1143 mm) or more, spacing between vertical members shall not exceed 4 inches (102 mm). Where there are decorative cutouts within vertical members, spacing within the cutouts shall not exceed 1.75 inches (44 mm) in width.

6. Maximum mesh size for chain link fences shall be a 2.25-inch (57 mm) square unless the fence is provided with slats fastened at the top or the bottom which reduce the openings to not more than 1.75 inches (44 mm).

7. Where the barrier is composed of diagonal members, such as a lattice fence, the maximum opening formed by the diagonal members shall not be more than 1.75 inches (44 mm).

8. Access gates shall comply with the requirements of Section AQ105.2, Items 1 through 7, and shall be equipped to accommodate a locking device. Pedestrian access gates shall open outward away from the pool and shall be self-closing and have a self-latching device. Gates other than pedestrian access gates shall have a self-latching device. Where the release mechanism of the self-latching device is located less than 54 inches (1372 mm) from the bottom of the gate, the release mechanism and openings shall comply with the following:
8.1. The release mechanism shall be located on the pool side of the gate at least 3 inches (76 mm) below the top of the gate, and

8.2. The gate and barrier shall have not opening greater than 0.5 inch (13 mm) within 18 inches (457 mm) of the release mechanism.

9. Where a wall of a dwelling serves a part of the barrier one of the following conditions shall be met:

9.1. The pool shall be equipped with a powered safety cover in compliance with ASTM F1346; or

9.2. Doors with direct access to the pool through that wall shall be equipped with an alarm which produces an audible warning when the door and/or its screen, if present, are opened. The alarm shall be listed and labeled in accordance with UL 2017. The deactivation switch(es) shall be located at least 54 inches (1372 mm) above the threshold of the door; or

9.3. Other means of protection, such as self-closing doors with self-latching devices, which are approved by the governing body, shall be acceptable as long as the degree of protection afforded is not less than the protection afforded by Item 9.1 or 9.2 described above.

10. Where an above-ground pool structure is used as a barrier or where the barrier is mounted on top of the pool structure, and the means of access is a ladder or steps, then:

10.1. The ladder or steps shall be capable of being secured, locked or removed to prevent access, or

10.2. The ladder or steps shall be surrounded by a barrier which meets the requirements of Section AQ105.2, Items 1 through 9. When the ladder or steps are secured, locked or removed, any opening created shall not allow the passage of a 4-inch diameter (102 mm) sphere.

AQ105.3 Indoor swimming pool. Walls surrounding an indoor swimming pool shall comply with Section AQ105.2, Item 9.

AQ105.4 Prohibited locations. Barriers shall be located so as to prohibit permanent structures, equipment or similar objects from being used to climb them.

AQ105.5 Barrier exceptions. Spas or hot tubs with a safety cover which complies with ASTM F 1346, as listed in Section AQ107, shall be exempt from the provisions of this appendix.
SECTION AQ106 ENTRAPMENT PROTECTION FOR SWIMMING POOL AND SPA SUCTION OUTLETS

AQ106.1 General.
Suction outlets shall be designed and installed in accordance with ANSI/APSP-7.
